Dear Fred,

Thanks for the copy of the initial draft of the CEVA charter sent to you by Jack Kerr.

Just two comments; first, I believe at one of our meetings we discussed wording such that the Association would be concerned only with on-the-road personal transportation so that it was clear our sole concern is for personal automobiles and not factory lift trucks or hospital wagons or golf carts or boats. Although many interests are similar we could get sidetracked if, say, the lift truck or golf cart people desired an association to look after their needs and outnumbered us. For this reason may I suggest we insert the word "highway" between "hybrid" and "vehicles" in Article II, Section 1.

Secondly, a small point, but I believe that the last word in Article V and the last word in the first sentence of Article VII should be "objectives" and not "objects".

If the first comment is valid, then I suppose our "Terms of Reference" should be changed to agree.

Sincerely,

Renton Patterson
