I am frustrated, impatient and lonely, so I have a good mind to get things moving and start an EU Association. There is a lot that I feel an association could do so I put down the other night and made out the attached pages. I would appreciate your comments and advice.

I have 5 years experience putting out an 8-page monthly newsletter for our local antique car club. I'm not doing that any more so I could put my time on an EU newsletter, maybe every 2 months to start. Maybe I could even forgo a membership fee until people saw what the newsletter would be like.

I would solicit memberships through the Canadian Renewable Energy News, Harrowsmith, Modern Power & Engineering, universities, newspapers etc.
